Controlled networks | Technology Focused Cloud Driven.

PRIVATE CLOUD, RENTED

ONE MONTHLY SERVICE

COMPUTE	Reserved processors and memory
STORAGE	All-flash and near-line tiers
NETWORK	Private connectivity and firewalling
PROTECTION	Backup and multi-region replication
OPERATIONS	24/7 NOC monitoring

INFRASTRUCTURE AS A SERVICE

Enterprise infrastructure, without buying the hardware.

Rent the compute, storage and network your applications run on, hosted in CNS private data centers. Sized by our engineers, monitored 24/7 and billed as one monthly service.

WHY COMPANIES STOP OWNING INFRASTRUCTURE

01

Hardware ages from day one

Capital goes into equipment that needs replacing in a few years, and the refresh always lands in a bad quarter.

02

Public cloud bills are hard to predict

Metered usage and data-transfer charges make the monthly number a surprise.

03

Infrastructure needs a team

Firmware, patching, capacity and the disk that fails at 2 a.m. all need someone on call.

Get an infrastructure quote.

What CNS Infrastructure as a Service includes

A private platform sized for your applications, with the engineering, monitoring and protection around it.

Private IaaS

Dedicated or logically isolated infrastructure. Your workloads do not share a public cloud region.

Compute and virtualization

Hosted virtual machines and application servers with reserved processor and memory capacity.

Enterprise storage tiers

All-flash for databases and virtual machines, near-line for capacity, on enterprise HPE platforms.

Multi-region design

Options to run or replicate across separate facilities, so one building is not a single point of failure.

24/7 NOC monitoring

Our operations center watches platform health and capacity around the clock.

Backup and replication

Data protection designed into the platform, with recovery objectives set per workload.

OWNING, PUBLIC CLOUD OR CNS IAAS

	OWNING HARDWARE	PUBLIC CLOUD	CNS IAAS
Up-front purchase	**Yes**	No	**No**
Monthly bill	Support and power	**Metered, it varies**	**Set by reserved capacity**
Hardware refresh	**Your project**	Provider	**Included**
Who answers at 2 a.m.	**Your staff**	**Your staff**	**The CNS NOC**
Where your data lives	Your site	Shared public regions	**Private CNS facilities**

HOW WE WORK

01

Assess

Applications, performance, capacity, security and connectivity needs.

02

Design

Compute, storage, network and protection, with a written bill of services.

03

Migrate

Staged moves with validation and a rollback plan.

04

Operate

24/7 monitoring, capacity management and reporting.

Request an IaaS quote.

Send us your application list and current servers. We reply with a design and a written bill of services.
